## Technical Data Sheet

### AMINO Ca

#### Specification:

Amino acid	100g/L
Seaweed polysaccharides	20g/L
CaO	200g/L

#### Technical characteristics:

It solves the problem that most fertilizer can not be mixed with calcium, and the technology is unique.

1. amino acid chelated calcium ,greatly enhance the absorption and translocation of Ca within plant tissues for maximum nutritional benefits.
2. in the market, many fertilizers cannot be mixed with calcium.

Sufficient calcium can improve the stability and hydrophobicity of cell membrane, and enhance the ability of crops to resist salt, freezing, drought, diseases and pests.

Calcium regulates the permeability of cell protoplasm membrane, is conducive to the transport of organic substances such as sugar and carbohydrate, and can improve the sugar content of fruits and vegetables

Calcium can increase fruit hardness, prevent cracked fruit and also prolong storage time

3. promote photosynthesis and stimulate plant growth
4. the formula can be customized according to customers' requirement

**Application:**

Foliar spray:1-2L/ha

Irrigation:2-4L/ha

**Package:**

1L,5L,20L,200L,1000L bottle/drum

**Remark:**

The formula can be customized according to customers' requirement
